Product Type: Rejuvenator
Product Name: Evoflex CA-7
Product Use: Recycled Asphalt Rejuvenator

Producer: Sripath Technologies
Product Type: Rejuvenator
Product Name: ReLIXER
Product Use: Recycled Asphalt Rejuvenator

NOTES:

1. Any product included on this list doesn't constitute approval for use in all applications. Contract or project specifications must still be met for acceptance of material in a given application.
2. Products on this list can be either plant added or terminally blended by the IDOT approved virgin liquid producer. Mix design dosage rates in excess of the terminally blended percentage must be added at the plant during production to meet the required dosage rate listed on the approved mix design.
3. All products plant added during production must be added through a Department approved additive system.
4. Producer and or products included on the list have complied with the requirements of CDOT Policy 17-01 and been approved for use by CDOT. New products would need to go through the CDOT Policy 17-01 process and be granted approval for use before going on the list.
5. If a product has a mix composition or constituent ingredient change the product would need to begin the approval process according to CDOT Policy 17-01 before it would be considered a qualified product again.
6. Products remain on the list until the composition or chemistry is changed, or the product has been shown to exhibit poor or failing performance. The determination of performance is at the discretion of the Commissioner.
7. The most current version of this CDOT approved list can be found on the following website www.cdotcmqa.com under Templates and Checklists. Login access to the website is not necessary to access the list.
